Compare Prices**

Understanding the Price Comparison

This Price Comparison compares only the price consumers pay on the Electricity line of the bill from their utility (Table A) to the price of electricity offered by the energy retailer (Table B). This is not a total bill comparison.

The information on this page and in Table A was prepared by the Ontario Energy Board (OEB). Table B and other information in this Price Comparison were prepared by the energy retailer.

Table A shows the prices that are billed by your utility based on time-of-use prices as set by the OEB in accordance with the *Ontario Fair Hydro Plan Act, 2017*. These prices are in effect until October 31, 2019.

Before Comparing Prices

Here are key things you need to know:

1. Other Charges

Even if you switch to an energy retailer, you will still have to pay other charges each month to have your electricity delivered to your home by your utility. These charges include Delivery and Regulatory charges as well as taxes.

2. The Global Adjustment (GA)

All electricity customers pay a portion of the GA. The electricity prices offered by your utility already include your portion of the GA. If you switch to an energy retailer, you will still have to pay your share of the GA and it will appear as a separate line item on your electricity bill. The GA is calculated, and can change, each month. Under the *Ontario Fair Hydro Plan Act, 2017*, you are

getting a credit that reduces your GA charges. The credit shown in Table B is in effect until October 31, 2019. It was set by the OEB in accordance with the *Ontario Fair Hydro Plan Act, 2017*. For more information, go to OEB.ca.

3. Time-of-Use Pricing

Under time-of-use pricing, the amount you pay for electricity depends on when you use it. A typical household uses roughly:

- 65% (or 487.5 kWh) during Off-Peak hours when prices are lowest
- 17% (or 127.5 kWh) during Mid-Peak hours when prices are higher
- 18% (or 135.0 kWh) during On-Peak hours when prices are highest

These patterns are reflected in Table A on the right.

The table assumes the typical Ontario household's electricity use of 750 kWh per month. Your actual monthly electricity use may be different.

TABLE

A Electricity Line Price From Your Utility

These prices are set by the OEB.

Off-Peak 487.5 kWh x 6.5 cents	\$ 31.69
Mid-Peak 127.5 kWh x 9.4 cents	\$ 11.99
On-Peak 135.0 kWh x 13.4 cents	\$ 18.09
Global Adjustment: 6.07 cents/kWh This cost is included in the above prices as described to the left.	
*Estimated Electricity Line Monthly Total	\$ 61.77

TABLE

B Electricity Line Contract Price offered by: ReliaBILL Electricity

These prices are not set by the OEB.

HOEP***+1 cent /kWh *** 750 kWh x 2.856 cents/kWh	\$ 21.42
Global Adjustment: 10.22 cents/kWh This is a forecast cost that can vary monthly.	\$ 76.65
- GA Credit: 4.15 cents/kWh	- \$ 31.13
= GA: 6.07 cents/kWh	= \$ 45.52
*Estimated Electricity Line Monthly Total	\$ 65.97

* You will also have to pay other charges to your utility including Delivery and Regulatory charges as well as taxes.

Description of Contract Price Offer

The Contract Price Offer information below and in Table B above has been prepared by:

ReliaBILL Electricity

by the OEB.

It has not been reviewed or approved

***ReliaBILL Electricity's Wholesale Power Price Plan is a forecast (i.e. a reasonable forecast covering a period of at least 18 months as issued by the Ontario Energy Board) based on the weighted Hourly Ontario Energy Price** ("HOEP"), as published by the Independent Electricity System Operator ("IESO"), Plus one cent per kWh. This price is variable and will change over the term of your Agreement.

Continued on page 3

Description of Contract Price Offer

Continued from page 2

HOEP, as published by the IESO, is applied to Customer's respective weighted hourly consumption, which weighted hourly consumption data will be obtained from Customer's Utility, or in the absence of available weighted hourly consumption data from Customer's Utility, ReliaBILL Electricity will estimate Customer's weighted hourly consumption based on Customer's Utility's net system load shape, as applicable to Customer's billing period, plus one cent per kWh (collectively, the "Wholesale Power Plus").
